About Us

Imdad Energy is an investment Saudi-based company with a global outlook, specializing in the development and investments in oil and energy projects, offering engineered operations solutions across all industry phases (Upstream - Midstream - Downstream). Established in direct strategic alignment with Saudi Arabia's national transformation goals.

We strive to become the region's definitive benchmark for sustainable energy solutions.

We take pride in our strong local presence in Saudi Arabia and our international expansion, including a strategic office in Houston, Texas-United States. This positioning enables us to attract global investment, build international partnerships, and export local expertise to global markets.

Basic information

-  Headquarter: KSA
-  Strategic Office in the USA
-  Specialists in the oil and energy sector
-  Local and global strategic partnerships

Our Vision

To be the leading Saudi company in developing and providing innovative energy solutions regionally and internationally, driven by investments, digital transformation, strategic partnerships, and environmental sustainability

Our Mission

At Imdad Energy, we are committed to delivering advanced, integrated services and solutions in the oil and energy sector.

We emphasize quality, efficiency, and innovation, supporting resource sustainability and contributing to comprehensive economic development through local content empowerment and value creation.

Our Values

✓ Quality

Adhering to the highest international standards

✓ Safety

Commitment to a strict preventive safety culture

✓ Innovation

Leveraging cutting-edge technologies

✓ Sustainability

Considering environmental impact and reducing emissions

✓ Empowerment

Developing national talent and future leaders

Engineering, Procurement, and Construction

We offer comprehensive services from initial engineering design to procurement and contractor management, and the execution of new construction projects or the development of existing facilities. Our services include

- ✓ Detailed and complete engineering design
- ✓ Preparation of equipment and material specifications
- ✓ Contract and contractor management
- ✓ Quality control and performance evaluation
- ✓ Turnkey solutions

Engineering

Procurement

Construction

Pipeline Services

We design and implement flexible solutions for the safe transportation of hydrocarbon products

- ✓ Design of network and linear systems
- ✓ Welding, insulation, and inspection works
- ✓ Initial operation and pressure testing
- ✓ Emergency and scheduled maintenance

Operations & Maintenance (O&M) and Turnaround Management

We manage periodic and planned operation and maintenance processes, including comprehensive shutdowns, to achieve maximum production efficiency and minimize unplanned downtime. Our services include

- ✓ Daily operation of industrial facilities
- ✓ Preventive and corrective maintenance
- ✓ Management of major shutdown periods (Turnaround)
- ✓ Improving energy efficiency and operational reliability

Oilfield Services

We provide field solutions covering all oilfield needs

- ✓ Manufacturing and repair of oilfield equipment
- ✓ Field support services
- ✓ Control and monitoring systems
- ✓ Supply of spare parts and supporting systems

Onshore & Offshore Drilling Services

We manage drilling operations using the latest technologies, focusing on safety, operational efficiency, and cost reduction. Our services include

- ✓ Drilling exploratory and production wells
- ✓ Horizontal and multi-directional drilling solutions
- ✓ Management of heavy drilling equipment
- ✓ Environmentally friendly drilling techniques and practices
- ✓ Adoption of smart drilling equipment to ensure the highest levels of performance and safety

Marine Services

We provide integrated marine solutions, including logistical support for offshore facilities, floating supply systems, and marine connectivity services, ensuring the sustainability of exploration and production operations in complex marine environments.

- ✓ Supply and operation of offshore support platforms
- ✓ Marine connectivity and logistics services
- ✓ Floating supply systems
- ✓ Safety and security solutions for deep-water operations
- ✓ Technical support for offshore oil and gas facilities

These solutions contribute to ensuring the sustainability and efficiency of marine operations at all stages.

Mining Services

We possess integrated capabilities for managing major mining operations, including

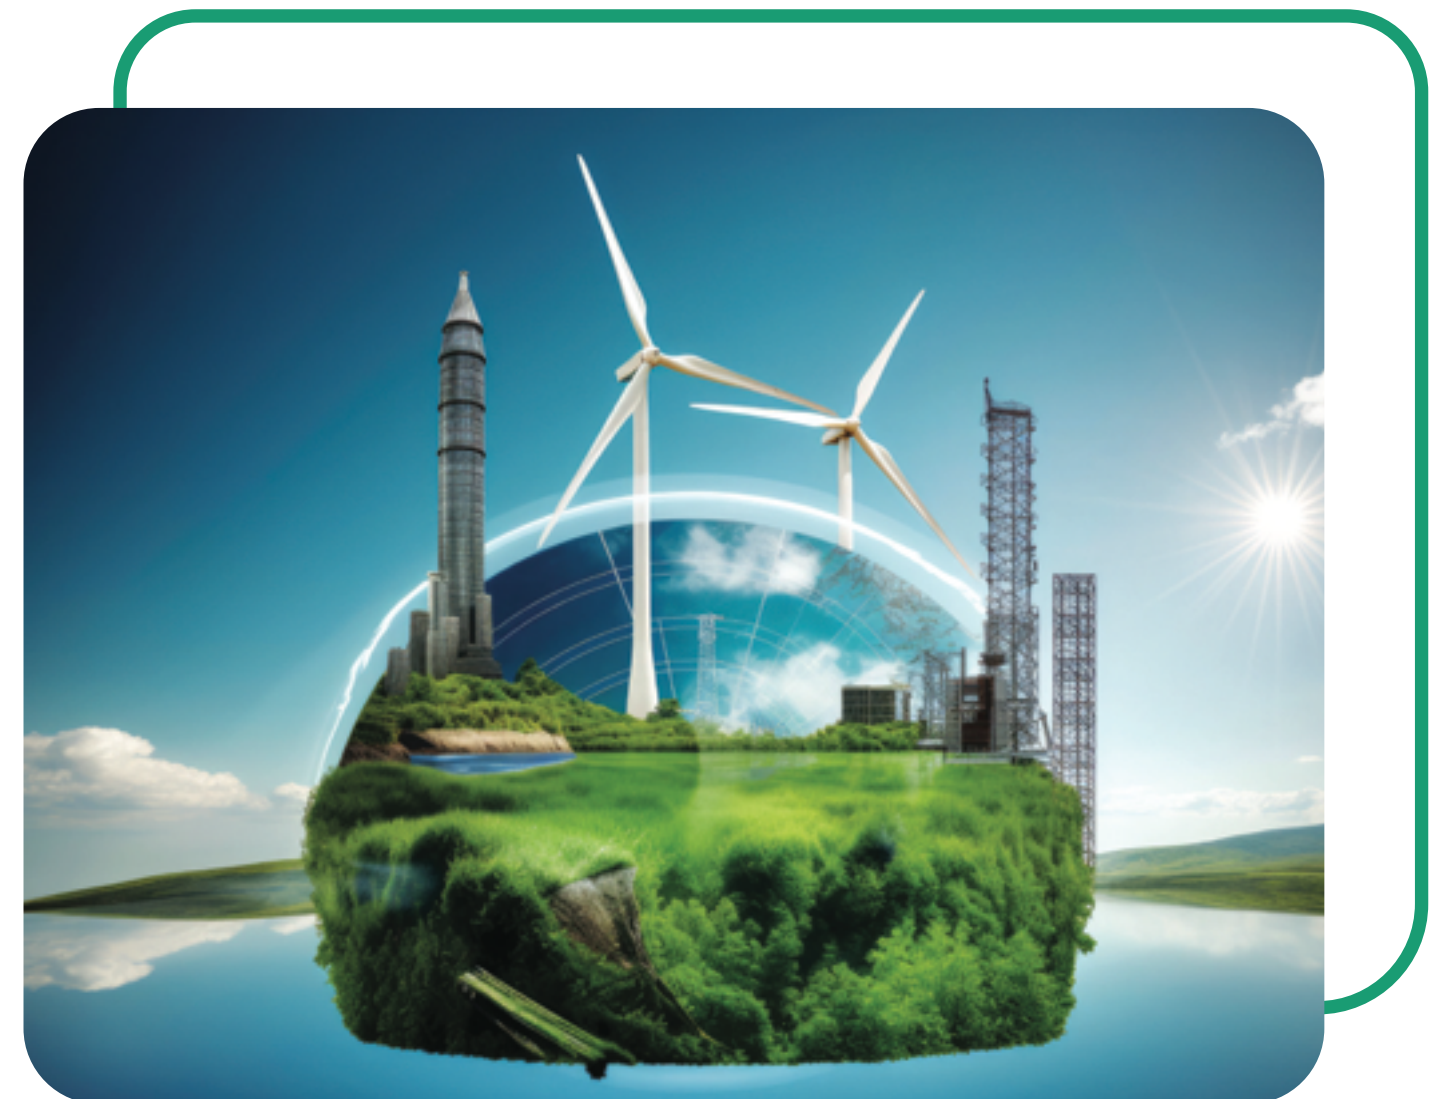

- ✓ Execution of overburden removal works
- ✓ Drilling and heavy transport
- ✓ Geological safety management
- ✓ Land reclamation and rehabilitation

Renewable Energy and Environmental Sustainability

We develop sustainable energy projects and implement integrated environmental programs aimed at reducing environmental impact and enhancing social responsibility, through

- ✓ Development of photovoltaic (PV) solar energy systems
- ✓ Execution of wind energy projects
- ✓ Provision of advanced energy storage solutions
- ✓ Integration of smart systems with the electrical grid
- ✓ Environmental impact assessment for projects
- ✓ Emission reduction plans and improved resource efficiency
- ✓ Environmental impact assessment for projects

Technology Empowerment and Digital Transformation Support

We help our clients integrate smart systems, artificial intelligence solutions, and the Internet of Things (IoT) into energy operations to enhance visibility, control, and data-driven decision-making

- ✓ Supply and operation of offshore support platforms
- ✓ Marine connectivity and logistics services
- ✓ Floating supply systems
- ✓ Safety and security solutions for deep-water operations
- ✓ Technical support for offshore oil and gas facilities

Advantages partnering with Imdad Energy

- ✓ Proven record of trust and success with public and private sector partners.
- ✓ Elevating Partner's performance through quality, precision, and operational efficiency.
- ✓ Tailored reliable solutions that align with local market needs.
- ✓ Execution with the latest technologies and global best practices.
- ✓ Integrating sustainability with local value chain development.

Strategic Initiatives

- ✓ Executing projects of multi-million dollars in value
- ✓ Investing in next-generation technologies
- ✓ Embedding innovation into our culture
- ✓ Deploying a dynamic knowledge base to enable evidence - based strategic decisions.

International Expansion & Investment

Through our office in Houston, Texas, we enhance our global investment presence and invite international Partners to participate in promising energy projects both within and outside the Kingdom. We believe that the synergy between strategic location and national vision makes Imdad Energy the ideal partner for cross-border collaborations.

Sustainability & Responsibility

- ✓ Use of Eco-friendly technologies
- ✓ Emission reduction and energy efficiency
- ✓ Participation in community and development initiatives
- ✓ Promoting environmental innovation and delivering positive impact

We don't just deliver projects — we build a sustainable future.

Certifications

We are proud to have obtained the following international certifications

ISO 9001:2015

Occupational Health & Safety Management System, which reflects our efforts to provide a safe and effective working environment

ISO 14001:2015

Environmental Management System, which highlights our responsibility to reduce the environmental impact of our activities and achieve sustainability.

ISO 45001:2018

Occupational Health & Safety Management System, which reflects our efforts to provide a safe and effective working environment

Management Team

Imdad Energy adopts a flexible organizational structure that enhances operational efficiency and supports specialization in various energy fields, includes
